

D-SHO-2000-4

IN THE SPECIFICATION:

Please substitute the attached first paragraph and title of the specification for the first paragraph and title of record to reflect the new claims which are directed solely to a method.

A Portable Device And System Method To Remotely Access A Computer From A Distant Location And For Using A TV or Other Video Monitor To Display Computer Data

FIELD OF THE INVENTION

This invention relates to a method ~~portable device and system~~ to remotely access a computer from a distant location ~~and for using a TV or other video monitor~~ at the distant location to display the stored computer data files for the purpose of reading and/or editing or creating new data files. The method ~~portable device and system~~ of the present invention may also be used to access the Internet through the remotely accessed computer so as to view and/or transfer information from the world wide web "WWW" for display in the TV or other video monitor.

Claim 6 (as currently amended) A method for accessing a computer located at a first location to view, create, modify and/or transfer information to and from the computer using a video monitor, browser and keyboard processor unit located at a second location remote from said first location with the keyboard processor unit having an ASCII encoder and decoder for receiving and transmitting ASCII data and a keyboard comprising the steps of: using a wireless communicating device and modem at said second location to establish a wireless interconnection through said browser with the internet for communicating between the keyboard processing unit and the computer and using the keyboard in conjunction with the video monitor at the second location to access ~~and/or~~ transfer information from ~~and/or to~~ the computer at the first location for display on said video monitor at the second location and to use the keyboard in conjunction with the video monitor to transfer and/or modify information stored in the computer in the first location. ~~while simultaneously displaying such information on said video monitor.~~

Claim 7- (as currently amended) A method as defined in claim 5 6 wherein said video monitor is a TV and wherein an RF modulator and an RF transmitter is used to transmit and receive information wirelessly between the keyboard processing unit and the TV video monitor .
